

You are invited to Film Talks: Exploring GDF

Join the Geological Disposal Facility (GDF) conversation through film at our events on **24 and 25 November**.

The film-based events are an opportunity to hear different perspectives on what geological disposal could mean for South Copeland and ask your questions.

There'll be short films, as well as talks and Q&As with geologists, engineers and scientists from Nuclear Waste Services, members of the Community Partnership, academics, the Environment Agency, the Office for Nuclear Regulation and the Committee on Radioactive Waste Management.
