Dear Resident

LLW Repository - Off-Site Geophysics Survey Work

I am writing to let you know that from the 22 September 2023 through to the end of December 2023 we will be carrying out further off-site geophysics surveys. This will help us improve our understanding of the bedrock surface to support geological model development for the 2026 Environmental Safety Case. Sub-contractors Jacobs will be conducting this intermittent work on behalf of the Repository site.

The study relies on passive geophysical data that we will collect from the points detailed on the image below, each one lasting ~ 30minutes. The surveys should create no disturbance from noise or vibration and will be manned throughout each survey. The images overleaf show the equipment that will be used to carry out the survey.

We do not anticipate any disruption from the survey work but if you have any queries or concerns please do not hesitate to contact us either by email (llwr.public.affairs@llwrsite.com) or via phone (019467 70253).

Thank you for your cooperation and understanding.

Your sincerely

Samantha Ward

Communications and Stakeholder Officer
